Re: Your first fax and a one-time special offer

Welcome to FaxBurner!

This is a test fax from Paul Rydell, founder of FaxBurner. I wanted to send you a fax so you can see how our service works, and know what to expect when you give out your fax number.

Although faxing is really retro, thousands of people have created an account or downloaded our apps (iPhone and Android), and use them to send and receive faxes securely every day. One day faxes will probably be completely replaced by email, scanners, and other technology - but until then we're excited to be able to offer completely free service.

In order to pay for the servers, the toll-free numbers, the monthly phone bill, and hopefully make a few extra dollars, I do offer some professional options that give you more features and flexibility. These services are priced well below the competitors (like efax).

The paid plans allow you to keep your fax number, and send and receive a lot more pages each month. It's a great way to save ink and paper and ditch that old um....

retro fax machine. Here's how...

1. Log In to your account at FaxBurner.com (or tap Visit FaxBurner.com from the app) and choose one of our flexible month-to-month plans starting at $9.95/month.

2. Tap on the orange "Keep This Number" button where you see your temporary number at the top of the FaxBurner app screen. This option allows you to purchase an annual plan for the highly discounted fee of $79.99 per year. The processing is done quickly and easily through an Apple In-App purchase.

Thanks,
Paul Rydell
Founder, FaxBurner
